## DATASCAN 7000 Distributed Data Acquisition System Voltage readings accuracy

The following graphs give the maximum error in \% of the reading for each range when using a 7020/21 DATASCAN Module, as per datasheet formulas:

| Range | Error as per datasheet |
| :--- | :--- |
| 10 V range | $+/-0.02 \%$ rdg $+0.01 \%$ range +1 bit |
| 1.3 V range | $+/-0.02 \%$ rdg $+0.01 \%$ range +1 bit |
| 150 mV range | $+/-0.02 \%$ rdg $+0.01 \%$ range +1 bit |
| 20 mV range | 16 bits $+/-0.02 \%$ rdg $+0.01 \%$ range $+5 \mu \mathrm{~V}$ |
|  | 14 bits $+/-0.02 \%$ rdg $+0.01 \%$ range $+10 \mu \mathrm{~V}$ |
